

# GABRIEL PENTEADO

FULL STACK DEVELOPER

## ABOUT ME

A dedicated front-end developer who also has a solid knowledge of back-end technologies. One of my strongest qualities is my ability to effectively tackle and solve problems, a skill I honed through programming. Find more about me and all my projects in **my Portfolio**.

## SKILLS & TOOLS

- HTML / CSS
- JavaScript
- React
- TypeScript
- TailwindCSS
- Next
- Redux
- Node
- Express
- Linux
- MySQL
- Prisma
- MongoDB
- GraphQL
- Docker
- Jest
- Figma
- Git
- GitHub
- VSCode

## LANGUAGES

- English
- Portuguese

## CERTIFICATES

- CS50 - Certificate  
CS50x - Harvard University

## PROJECTS

### Dental Procs

*React - TypeScript - TailwindCSS - Node - Prisma - MySQL*

A specialized application designed for dentists to monitor the most performed procedures in their clinics and track performance trends over time.

- Complex data system implemented with Day.js library.
- Accessible design system using RadixUI library.
- Data validation with Zod library.
- Modern pie chart created with ApexCharts library.

### React-form

*Vite - React - TypeScript - ChakraUI - Firebase*

A registration form created with React and Typescript using React-Hook-Form library for form validation. It's integrated with ChakraUI and with Realtime Database from Firebase.

- Password strength meter.
- Light / Dark mode.

### Watch Store

*React - Redux - TypeScript - TailwindCSS*

A modern watch store website created with React, Redux and TailwindCSS.

- Use Redux Toolkit for state management.

### Ebooktoria

*React - TypeScript - TailwindCSS - Prisma - GraphQL*

Ebooktoria is a project that helps you keep your favorite ebooks in one place.

- Use GraphQL to query data from a created API.
- Authentication system using NextAuth.
- Prisma ORM to access and manage the database.

### MyDearPage

*HTML - CSS - JavaScript - Node - Express*

MyDearPage is a personalized start webpage to kickstart your web browsing. (**weather app** | **to-do list** | **clock** | **wallpaper**)
